ERRATA

As shown by Fig. 1 in the paper, the heliostat azimuth angle ψ is measured in clockwise direction from the north axis. This convention of ψ contradicts the analysis in the paper. Noting that ψ has only been defined in Fig. 1, equations (9) and (13) are incorrect. However, this can be corrected if ψ is defined anticlockwise from the east axis. Several typing errors in the text should also be noted:

Equation (5): missing two closing parentheses
Equation (8): last term should read $BB_H$
Equation (37): the term $V_H$ should read $V_F$
